

JAROON

THE GUFY DYSHAS

DYSHAS OF THE 8TH MOON

A new moon has been discovered around Jorune. The satellite Gufy has an eccentric orbit taking 523 days to orbit Jorune, swooping in at the perigee of each orbit at an altitude of about 75 feet, when it scares the bejesus out of everyone in its path.

The isho of Gufy is argyle and the dyshas of Gufy must be woven quickly or the moon will move too far away to supply sufficient isho to form the dysha.

Whoopee Cushion (5 Gufy, 15 Launtra) A successful roll will project an extremely rude noise to the target.

Slapstick (10 Gufy, 10 Gobey and 10 Launtra) Also called **Laughtrack**, this dysha attacks the target with a two foot long, flat dysha that makes a) a very loud WHACK as it slams into the target's backside, and b) the sound of a small group of people laughing as the target falls to the ground, face first.

Pass (15 Gufy, 15 Launtra) This dysha weaves a small orb of argyle isho, which can be directed to a specific individual to carry a short phrase. It is usually woven by young muadra men after large amounts of rusper. A really Great Success

on the dysha may result in a dysha that drifts to an attractive muadra woman and whispers "I've never seen eyes that were quite that color..." A failure might mean the orb was successfully woven, but the message was "Hey, babe, how much?" and usually results in a black eye.

Banjo (25 Gufy, 25 Launtra) This dysha will generate the illusion of a shantha with a stringed instrument with a long neck and round body on the shantha's knee. An extra 10 Launtra or 5 yules are required to make the illusion play "Camptown Ladies," or the illusion will simply go "plinka plinka plinka" and tune up for 1d3 hours.

Moon (40 Gufy, 5 Shal, 3 Desti, 1 Ebba and 1 Tra) This weave forms creates two large peach colored orbs that are covered with a layer of dark blue Shal isho. The dysha forms about two feet from the face of the target, then the Shal isho slowly lowers and the two orbs are revealed briefly to the target, which is a good way to start a fight.

These dyshas can only be woven when the moon is under 15,000 feet and swinging through the perigee of its orbit.

YOUR CONTRIBUTION TO SHOLARI...

We are looking for contributions. We particularly would like detail of Joruni lands or societies (for the new JORUNIGRAPHICA section), humor for Jaroon, expansions for game play (for the JORUNE AND A HALF section) and lists that make more of Jorune 'real' for players and sholaris. Write!
